ABOUT THE COMPANY

IC Solution (ICS) is a digital service provider that aims to provide software, designing and marketing solutions to individuals and businesses. At ICS, we believe that service and quality is the key to success. We provide all kinds of technological and designing solutions from Billing Software to Web Designs or any custom demand that you may have. Experience the service like none other!

Some of our services include:

- Development - We develop responsive, functional and super-fast websites.
 - We keep User Experience in mind while creating websites. A website should load quickly and should be accessible even on a small view-port and slow internet connection.
 - Mobile Application - We offer a wide range of professional Android, iOS & Hybrid app development services for our global clients, from a start up to a large enterprise.
 - Design - We offer professional Graphic design, Brochure design & Logo design. We are experts in crafting visual content to convey the right message to the customers.
 - Consultancy - We are here to provide you with expert advice on your design and development requirement.
 - Videos - We create a polished professional video that impresses your audience.

OVERVIEW OF THE PROJECT

Project Name: Tribute to Doctors

Team Members: Suprith K S

Suhas GC

Sagar K

This project is based on Web Development And its Applications. The main objective of this project is to learn the implementation of HTML, CSS and JavaScript. The basic webpage of this project is created using HTML and styling of the webpage is done using CSS.

The basic webpage of this project is created using HTML ,and styling of the webpage is done using CSS.This webpage is about a tribute to frontline corona warrior Doctors.the secound wave of coronavirus crisis in India steadily engulfed the nation.Doctors form an essential part of an effective response to the COVID-19 pandemic.Doctors have sacrificed their life while saving patients during the ongoing COVID-19 Pandemic. The deadly secound wave of coronavirus took away several lives that were protecting us.According to IMA (Indian Medical Association) over 1,500 doctors lost their lives during the ongoing pandemic in India.

About the frontline Corona warriors-DOCTORS

Doctors form an essential part of an effective response to the COVID-19 pandemic. They have critical roles in diagnosis, containment and treatment, and their commitment to treat despite increased personal risks is essential for a successful public health response. Frontline workers have been experiencing high work volume, personal risk and societal pressure to meet extraordinary demands for healthcare. Despite this traditional public health, ethics has paid little attention to the protection of the rights of doctors. The list of the sleep-deprived heroes includes doctors, nurses, medical cleaners, pathologists, paramedics, ambulance drivers, and health-care administrators. In the fight against corona virus, the brave medical army stands strong with thermometers, stethoscopes, and ventilators as their weapons. Not to forget, medical researchers are worked day in and night out against all odds, to find the vaccine to the disease

Since the coronavirus outbreak, Doctors have not only experienced the gratification of healing patients and saving their lives but have also lost many battles along the way. On top of that, many doctors have even sacrificed their own lives in the line of duty. Every day, the selfless warriors are giving it their all in health-care settings while cutting themselves off from their families and loved ones. The sacrifice that they are making for the safety and welfare of humanity is priceless and deserves lifelong gratitude on our end. Most importantly, we must reassess the value health-care workers hold in our lives and the kind of treatment they get from us.

They deserve all the appreciation and support. The sacrifice of doctors and healthcare workers across the globe will not go to waste. Humanity will always be grateful to them for what they are doing during these unprecedented times. The respect for healthcare professionals has grown manifolds in the hearts of people. It is good to see that the Government of India along with the governments worldwide have decided to allocate more budget for healthcare in their respective countries. The world is taking the health, healthcare professionals and hospitals more seriously, as it appears. More work is expected to be done for hospitals and intensive care units (ICUs) to strengthen the healthcare infrastructure in India as well as in countries across the world.

Tribute to Doctors

The stories of the medical heroes putting themselves on the forefront to fight the virus are inspiring and heartbreaking at the same time. They deserve all the appreciation and support. The sacrifice of doctors and healthcare workers across the globe will not go to waste. Humanity will always be grateful to them for what they are in these unprecedented times. The respect for health care professionals has grown manifold in the hearts of people. And it's doctors who are our first line of defence. India will not forget the contribution of the doctors in fighting COVID-19. Across the country, there are so many stories of doctors fighting the good fight, day in and day out. It is good to see that the government of India along with the government worldwide, have decided to allocate more budget for healthcare in their respective countries. The world is taking the healthcare professionals and hospitals more seriously.

TOOLS USED

Software Requirements

- Visual Studio Code 2019.
- Google Chrome or Microsoft Edge of latest version.
- Front End: HTML, CSS, JS (optional)
- Linux 7.1 or Windows XP/7/8/10 OS or Mac OS

Hardware Requirements

- Pentium 200-MHz computer with a minimum of 64 MB of RAM (128 MB of RAM recommended).
- Monitor with a refresh rate of at least 40Hz for a smooth GUI experience (optional).

```
<p class="para">&ensp; Doctors With over more than 212 million cases worldwide. There were more than 4
```

million deaths and more than 189 million Covid-19 patients were recovered.

Needless to say, doctors, nurses and people working in health-care sectors are particularly vulnerable to the highly infectious disease. In response to the global pandemic, the under-resourced doctors are facing unprecedented challenges. The list of the sleep-deprived heroes includes doctors, nurses, medical cleaners, pathologists, paramedics, ambulance drivers, and health-care administrators. In the fight against coronavirus, the brave medical army stands strong with thermometers, stethoscopes, and ventilators as their weapons. Not to forget, medical researchers are working day in and night out against all odds, hoping to find the antidote to the disease.

<source src="hl.mp4">

</video>

</div>

<div>

<p class="para"> At least 17,000 health workers have died worldwide from COVID-19 over the last year, Amnesty International has said, while also calling for a rapid vaccine release to protect millions of front-line healthcare workers.
</p>

<p class="para">  The human rights group called on governments to include all front-line workers in their vaccine distribution plans as many poorer countries are expected to receive their first batches in the coming weeks and months.
</p>

<p class="para"> Every day, the selfless warriors are giving it their all in health-care settings while cutting themselves off from their families and loved ones. The sacrifice that they are making for the safety and welfare of humanity is priceless and deserves lifelong gratitude on our end. Most importantly, we must reassess the value health-care workers hold in our lives and the kind of treatment they get from us. Among the several lessons this coronavirus pandemic has been teaching us, the biggest one is to find ways to sufficiently invest in the better and more efficient medical fraternity and give medical professionals the respect, compensation and infrastructure that they truly deserve once this crisis is over. Moreover, the world needs to work towards advancement in medical research and technology. Nothing will be a greater tribute to the health-care workers than this.

```

 Amidst the prevalence of the Covid-19 pandemic, the Indian Medical Association on Tuesday said that 798 doctors died during the second wave of Covid-19 across the country of which maximum 128 doctors lost their lives in Delhi, followed by Bihar at 115.

 As per the official note by the IMA, the number of doctors who lost their lives in the pandemic in Delhi stands at 128, followed by Bihar at 115 and Uttar Pradesh at 79.

 States like Maharashtra and Kerala where the prevalence of the Delta Plus variant of Covid-19 is on a rise also reported deaths of doctors in double digits. Maharashtra reported 23 doctor deaths and Kerala reported 24 deaths.

 Pondicherry reported the lowest deaths of doctors by logging one death only. Hours after Prime Minister Narendra Modi on Sunday praised doctors for going out of their way to extend help to people during the coronavirus pandemic, IMA President Dr JA Jayalal said that the PM has assured that doctors will be respected, protected and safeguarded.

 Like every year, the country celebrated National Doctors' Day on July 1 to honour the contributions of the doctors. The first National Doctor's day was celebrated in the country in July 1991.

 "PM Modi ensured that doctors should be respected, protected and safeguarded. He also emphasised the need for vaccination. We're celebrating this year's National Doctors' Day (July 1) in remembrance of the veteran Dr BC Roy. We're so much pleased that PM Modi greeted the medical fraternity for the Doctors' Day," the IMA President had said.

 On June 25, the Indian Medical Association (IMA) informed that 776 doctors lost their lives in the second wave of Covid. According to the IMA Covid registry on June 25---in the state-wise doctors martyrs list, Bihar saw the maximum number of 115 deaths, followed by Delhi at 109, Uttar Pradesh 79, West Bengal 62, Rajasthan 44, Jharkhand 39, and Andhra Pradesh 40.

 Meanwhile, India on Tuesday reported 37,566 fresh Covid-19 cases, the first time in 102 days that daily cases dropped below the 40,000 mark, the Union health ministry informed. With this, the country's total Covid-19 tally stands at 3,03,16,897, including 2,93,66,601 recoveries and 5,52,659 active cases.
